

AN 8-WEEK CLINICAL STUDY EVALUATING THE EFFICACY OF OSMOSIS DNA REPAIR SERUM.

CATALYST AC-11®

“ Expert clinical grading revealed immediate, statistically significant improvements in the appearance of the skin with just one application. This is the only serum to show an improvement in precancerous lesions without causing any irritation in the skin attesting to its powerful ability to reverse the signs of aging. The majority of subjects saw immediate improvements in their skin’s firmness, elasticity, tightness and radiance. Formulated to repair DNA and build collagen, Catalyst AC-11 shows just how transformative a serum should be. ”

- BEN JOHNSON, MD

INCREASE IN SKIN ELASTICITY

REDUCTION IN BROKEN CAPILLARIES & REDNESS

IMPROVEMENT IN SKIN RADIANCE & LUMINOSITY

TIGHTENING OF THE EYELIDS

REDUCTION OF PRE-CANCEROUS SKIN LESIONS
